OBJECTIVE

Work as a Backend or Full Stack Developer, contributing my skills to the company's growth and adapting to new challenges and technologies.

PROFILE

My name is Daniel, I'm a Full Stack developer with experience in technologies such as C# .NET, JavaScript, HTML, CSS and frameworks such as Vue.js and React.js. I began my programming journey self-taught, developing technical skills and a keen interest in the area. Since then, I've focused on persistently improving myself, both in software development and in improving my English.

I have knowledge of DDD architecture and code quality standards, such as the use of dependency injection and interfaces for signing classes. I also have a degree in Systems Analysis and Development and a postgraduate degree in Software Engineering.

Professional Experience

- **RCA Sistemas** – June 2021

With a focus on .Net Core using C#, I have been involved in challenging projects, using Dapper and Entity Framework Core to create more efficient solutions.

- Maintenance/development of applications/APIs in C# .Net following good DDD principles
- Web application maintenance/development (Vue.js+Bootstrap) and Desktop (Windows Forms+DevExpress)
- Git tool for code version control
- Use of Jira Software to control the team's workflow (Scrum and Kanban)
- Use of JWT and Identity for user authentication/authorization
- Use of the SQL language (SQL Server and MySQL) to manipulate databases

ACADEMIC BACKGROUND

- **Universidade Estácio de Sá** - Itaocara, RJ
Degree in Systems Analysis and Development - August 2021 – December 2023
- **Unyleya** - EAD
Postgraduate Diploma in Software Engineering - January 2024 – October 2024

Skills

- **C# .Net Core/Framework**
- **SQL (MySQL e SqlServer)**
- **Git/Github**
- **Jira Software (Scrum e Kamban)**
- **Linux**
- **Oracle Cloud**
- **HTML**
- **CSS**
- **Bootstrap**
- **JavaScript**
- **ReactJS**
- **VueJs**

LANGUAGES

- **Portuguese** – Native
- **English** – B2 Upper Intermediate (with the aim of reaching C1 soon)
