OBJECTIVE

Work as a Backend or Full Stack Developer, contributing my skills to the company's growth and adapting to new challenges and technologies.

PROFILE

Hello. My name is Daniel, a Full Stack Developer with experience in technologies that include, but are not limited to: C# .NET, JavaScript, HTML, CSS, Vue.js and React.js Frameworks.

I started my career as a self-taught programmer. When I started my studies, I did not have internet access at home, but this limitation was never an obstacle for me. On the contrary, it strengthened my determination to seek alternatives and achieve my goals. With a lot of effort and dedication, I managed to provide internet access at home, which helped me to further develop my learning possibilities. Today, we continue to study hard, always seeking to grow and overcome new challenges.

In addition, I am very interested in deepening my knowledge of software development processes. My English level is B2, and I am working hard to reach level C1 soon. I have a deep knowledge of DDD architecture, quality code standards such as dependency injections, and the use of interfaces to create applications with a rich domain model. My background includes a degree in Systems Analysis and Development and a postgraduate degree in Software Engineering, so I have a theoretical and practical background that is advantageous for the subject.

I am good at dealing with people, which facilitates my teamwork and makes me effective in communicating with different professional profiles, contributing to the success of the projects I am involved in. I am an extremely patient, hard-working and resilient person who knows how to make good decisions. If I am considered the ideal candidate for the position, I would be deeply grateful and honored to be part of your team. See this opportunity as a chance not only to apply my skills, but also to learn, grow and contribute to the success of the company.

Professional Experience

- **RCA Sistemas –** June 2021

With a focus on .Net Core using C#, I have been involved in challenging projects, using Dapper and Entity Framework Core to create more efficient solutions.

- o Maintenance/development of applications/APIs in C# .Net following good DDD principles
- o Web application maintenance/development (Vue.js+Bootstrap) and Desktop (Windows Forms+DevExpress)
- o Git tool for code version control
- o Use of Jira Software to control the team's workflow (Scrum and Kanban)
- o Use of JWT and Identity for user authentication/authorization
- o Use of the SQL language (SQL Server and MySql) to manipulate databases

ACADEMIC BACKGROUND

- **Universidade Estácio de SÁ** - Itaocara, RJ
  Degree in Systems Analysis and Development - August 2021 – December 2023

- **Unyleya** - EAD
  Postgraduate Diploma in Software Engineering - January 2024 – October 2024

Skills

- **C# .Net Core/Framework**
- **OOP (Object-oriented programming)**
- **SQL (MySQL e SqlServer)**
- **Git/Github**
- **Jira Software (Scrum e Kamban)**
- **Linux**
- **Oracle Cloud**
- **HTML**
- **CSS**
- **Bootstrap**
- **JavaScript**
- **ReactJS**
- **VueJs**
- **Docker**

LANGUAGES

- **Portuguese** – Native
- **English** – B2 Upper Intermediate (with the aim of reaching C1 soon)
